

HONESTLY BETTER SOLUTIONS

FOR THE BIGGEST MACHINES ON EARTH

FIELD SERVICES • DESIGN & ENGINEERING • MANUFACTURING & REPAIR

L&H
INDUSTRIAL

TEMPE, AZ

Manufacturing and Repair

At our world-class facility in Tempe, we have full custom manufacturing and repair capabilities for the largest-scale industrial machinery, with additional specialization in industrial machine gears, gearboxes, pinions and pinion shafts. Our 60,000 square foot shop has a 200-ton capacity overhead crane for handling massive components and assemblies.

Machining

Our machining facilities provide quick turnaround for your gearing and components, whether it's a repair, rebuild, reband or a newly machined component—we have the equipment and personnel to get the job done.

Mechanical

Whether it's inspection, tear downs or assembly, we can provide solutions for your components with the highest quality parts.

Welding

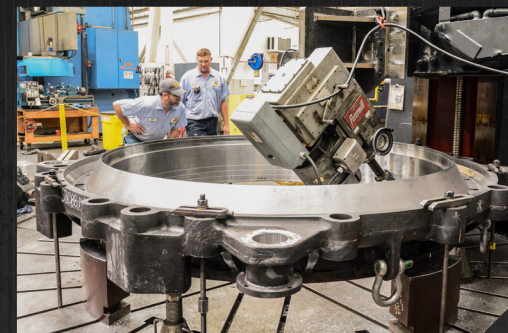

Our multi-faceted welding processes, fabrication capabilities and complementary equipment can handle your most challenging requirements; whether it's shop support or in the field.

Engineering and Design

Based on the challenges our customers face and insights from our expert field crews, our specialized engineers develop innovative assemblies and technology advancements to create uptime for your operations.

Field Services

Our experienced field crews provide trouble shooting, repairing, rebuilding and installing components for your operations.
