& REPAIR

### Improving your assets and operations

Our specialized engineers and expert production teams use state-of-the-art equipment to work at the forefront of design and manufacturing to support the aerospace industry. From a proprietary design you need manufactured to a custom solution, our teams are ready to help.

AEROSPACE

## State-of-the-art machining

### Critical tolerances matter for your critical missions

Precision machining to the nth degree—in the field and in the shop. L&H has the most advanced field machining technology and the facilities to handle large and complicated equipment fabrications and structures used in the military and defense industry.

## Fabrications with quality and safety built into design

### World-class capabilities, facilities, and equipment behind every project

L&H uses advanced robotic welding technology to achieve extremely accurate and efficient results. Our facilities are equipped with crane capacity handling up to 200 tons. We've also provisioned our custom manufacturing and repair facilities with quality equipment including laser trackers, Faro arms, and non-destructive testing to ensure we will get it right for you the first time.

### Registrations & certifications

- Member of AGMA
- HUBZone certified
- Pursuing compliance with DFAR, FAR, and CMMC requirements

### Higher performance and safety standards

100% of L&H premium components meet, or more often exceed, OEM performance, quality, and safety standards.

Learn more about L&H services and our components and assemblies for specific industrial solutions on our website, or contact us to find out how we can improve your industrial solutions.
