### Built for Your Operations

Our 135,000 square foot facility is built to handle the big, the small and the complicated. We house technology and equipment that leads manufacturing across industries. Specifically set up to support heavy industries with large equipment and structural needs, precision tolerance requirements, and on-site repair, installation, or troubleshooting services; at L&H we have your industrial equipment and operations covered.

### Experts in the Shop and in the Field

- With a variety of machines and dedicated shops, we provide complete solutions from initial design to support in the field. At L&H, the simple fact is – We build it better, we build quality. No exceptions.
- When you need a root cause analysis or large mechanical rebuild; L&H's Gillette facility can handle it; and we partner with our customers to deliver exactly what you need and your unique equipment or operation.
- Our experienced mechanics and large shop are equipped to handle assembly and teardown - our skilled welders and machinists deliver quality fabrications and precision finishes – and our knowledgeable field service technicians solve complex problems for the biggest machines in your operation.
- Give us a shot, we love a challenge, and we deliver on our promise of making things Honestly Better.
