

SHERIDAN, WY

## SHOP CAPABILITIES

Vertically integrated for complete solutions for over 50 years.

### Anytime, anywhere.

After over 50 years on the job, we have seen why equipment fails and have turned our knowledge into a global leader in Engineering & Design, Manufacturing & Repair, and Field Services. We fix problems for the biggest machines on earth and partner with our customers on solutions that drive operations.

## Safe. Expert. On-time.

Built to handle your repairs when they matter most; our Sheridan facility houses machine technology and capabilities that deliver quality, safety, and innovation. As our complete hydraulic repair facility, we can handle you hydraulic and mechanical repairs and rebuilds with ease and efficiency.

### Built for Your Operations

We know your equipment is critical to operations, and our 53,000 square foot facility specializing in component rebuilds, machining, welding and field service support. With large in-shop crane capacity, we can handle your components with ease.

### Experts in the Shop and in the Field

- With a variety of capabilities in the shop and in the field, our teams offer comprehensive solutions to support your components entire life cycle.
- From fabrication to repairs, our shop can manufacture components or rebuild your equipment and operation's most critical components and assemblies so you can get your production up and running again.
- When you need a root cause analysis or hydraulic or mechanical rebuild; L&H's Sheridan facility is equipped to deliver quality results you can count on out in the field.
- Our experienced field service technicians solve complex problems as well as hydraulic, mechanical and electrical troubleshooting. Here to support you in the shop, in the field, and around the world; L&H is your trusted partner when getting it right the first-time matters.
