

TEMPE, AZ

SHOP CAPABILITIES

Vertically integrated for complete solutions for over 50 years.

Anytime, anywhere.

After over 50 years on the job, we have seen why equipment fails and have turned our knowledge into a global leader in Engineering & Design, Manufacturing & Repair, and Field Services. We fix problems for the biggest machines on earth and partner with our customers on solutions that drive operations.

Safe. Expert. On-time.

Built for the big and the complicated – Our Tempe, AZ manufacturing facility was built specifically for large gearing, fabrications, and massive assembly overhauls. Technology, equipment, and experienced teams deliver quality each and every time, so when your operation's critical components are down, know that you have a partner to handle the load.

Built for Your Operations

We know your equipment is critical to operations, and our Tempe, AZ facility offers over 60,000 sq./ft. of manufacturing space dedicated to manufacturing and repairing equipment you need. Our state-of-the-art facility specializes in engineering, manufacturing, component rebuilds, machining, welding, inspections, and field service support. With large in-shop crane capacity of 200-tons, we can handle your components with ease.

Experts in the Shop and in the Field

- With a variety of machine technology, experienced teams, and facilities equipped for large complex assemblies, we can handle just about anything.
- From our 6-meter gear grinder and welding positioner, to our transmission test bench and large lathes; we have invested in our capabilities to serve your operations and deliver quality each and every time.
- Our experienced field service technicians solve complex problems for the biggest machines in your operation. From installation and assembly, to relocations, troubleshooting, and repairs. If it's big, small, or complicated; chances are L&H can fix it.
