- Eliminates Live Work (ELW)
- Test Multiple Channels Simultaneously
- 10 Hour Battery Life

**Maximise
Safety**

**Eliminate
Live Work**

**Wireless
up to 50m**

**Purpose Built for
Heavy Industry**

The **SafeTest DI Series** is designed to remotely measure clearances, tolerances and wear on machine components safely and efficiently - out of the line of fire.

Capable of measuring up to 10mm (0.39inch) of displacement with an accuracy of 0.01mm (0.0004inch) and wireless connectivity of up to 50m (164ft) away, the SafeTest DI Series is recognised as a new industry standard.

Packaged in a rugged hard shell carry case, with built-in charging harness, the SafeTest DI Kit is always ready to go at a moment's notice.

“The SafeGauge products are a great addition to our tooling inventory.

SafeGauge Dial Indicators remove personnel from the footprint of the machine - away from crush/pinch points. The DI2 Kit allows multiple tests/channels to be carried out at the same time, reducing testing duration.”
