

WIND POWER

TURNING INNOVATION INTO ENERGY

STRONGER WIND ENERGY TOGETHER

For 60 years, L&H Industrial has been a trusted partner in critical asset maintenance, bringing deep mechanical expertise and a collaborative spirit to the wind energy sector. We deliver precision-engineered solutions, complete component rebuilds, and specialized field services to enhance turbine performance and longevity. Driven by advanced engineering and a relentless commitment to quality and innovation, we work side by side with wind operators to maximize reliability, minimize downtime, and keep power generation running strong.

DESIGN & ENGINEERING

Optimize your wind power operations with L&H Industrial's expertise in designing innovative solutions and advanced engineering for critical turbine components.

FIELD SERVICES

Our experienced crew collaborates with and works alongside your team to troubleshoot, repair, rebuild, install, and maintain your wind power equipment.

MANUFACTURING & REPAIR

Our expert team manufactures and repairs essential parts using precision equipment in advanced facilities, enhancing reliability, safety, and performance in wind energy.

MONITORING & CONTROLS

Our digital solutions use advanced AI to deliver real-time insights for predictive maintenance and machine monitoring, keeping you informed anytime.

We don't just maintain wind turbines—we engineer solutions that keep them turning stronger, longer, and smarter.

Power Generation Product Line Manager
L&H Industrial

STRENGTH WHERE IT MATTERS

Even the smallest imperfections in main shafts can lead to costly failures. At L&H, our precision-first approach removes fatigued surfaces, enhances material strength, and optimizes component fit to extend asset life. Our advanced machining, bearing upgrades, and lubrication flushing ensure durability and reliability. With deep expertise in turbine loads and failure points, we deliver solutions that reduce risk, minimize downtime, and maximize performance.

EXPERTISE WHERE YOU NEED IT

Wind turbines operate in harsh conditions, and when repairs or upgrades are needed, L&H's field service teams are ready to respond. With expert knowledge, advanced tooling, and a problem-solving mindset, we provide precision repairs, thorough inspections, and full-scale component installations—keeping your equipment running efficiently and reliably.

KEEP CRITICAL ASSETS OUT OF CRITICAL CONDITION

- Inspections
- Failure analysis
- Main shaft upgraded rebuilds
- Custom mechanical solutions
- Rush breakdown repairs
- Field welding

NO PROBLEM IS TOO BIG, SMALL, OR FAR AWAY

- Portable machining
- Uptower machining
- Yaw system machining
- Field machining
- Tower dent repair

PLATFORMS SERVED

- Goldwind
- Acciona
- Suzlon
- GE
- Vestas
- Mitsubishi
- Nordex
- SGRE
- And more
