

L&H INDUSTRIAL

ROLLING STRONG

KEEPING MINES MOVING

The toughest machines in the world need more than repair. They need a partner the industry trusts to push beyond OEM limits and deliver something stronger. At L&H Industrial, we don't just get equipment running again, we rethink, reengineer, and rebuild it to outlast, outperform, and outwork the standard. From haul trucks to loaders and graders, our shop and our people are built to handle the biggest machines with precision and control from start to finish.

With design, manufacturing, field service, and machine monitoring all under one roof, L&H delivers complete solutions, giving operations confidence that their equipment won't just go back to work, it will keep...

ROLLING STRONG

L&H INDUSTRIAL

PERFORMANCE WITHOUT COMPROMISE

ALL THE CAPABILITY. ONE PARTNER.

We're not OEM, and that's our advantage. We prove our value by delivering capabilities that go deeper, work harder, and create more value across your fleet. Every solution is engineered, built, and tested to perform beyond the standard.

ENGINEERING

Effective engineering goes beyond theory. Our engineers analyze how equipment is truly used, then design and validate solutions that correct root causes, improve structural performance, and extend service life in demanding operating environments.

MACHINING

From precision components to some of the largest haul truck parts on earth, our machining centers deliver accuracy at scale. Every cut, tolerance, and finish is engineered for repeatability, durability, and long-term performance in real-world conditions.

WELDING

Heavy fabrication demands more than strength alone. Our certified welders rebuild, reinforce, and reengineer critical components with weld quality proven in the harshest environments, restoring integrity and extending service life where it matters most.

MECHANICAL

Our mechanics are problem solvers first. From teardown to complete rebuild, we go beyond replacement, diagnosing failures at the source and rebuilding equipment to perform better than before.

INDUSTRIAL HARD CHROME PLATING

Wear life is everything. Our advanced hard chrome plating restores critical surfaces, reduces friction, and extends hydraulic performance, pushing component life well beyond OEM expectations.

QUALITY

Performance isn't assumed, it's proven. Every component is inspected, measured, tested, and recorded in detailed inspection reports to ensure it meets exacting standards before returning to service.

”

MOBILE EQUIPMENT FAILURE HAPPENS WHEN DESIGN ASSUMPTIONS ARE TESTED BY REAL-WORLD CONDITIONS. WE ENGINEER SOLUTIONS AROUND HOW MACHINES ARE ACTUALLY USED.

Dan Miachkov
Mobile Equipment Product Line Manager

THE BACKBONE OF PRODUCTION

Every ton moved in a mine depends on haul trucks built to survive relentless loads and nonstop operation. At L&H Industrial, we combine deep engineering expertise with in-house design and manufacturing to create upgraded solutions that extend the limits of these giants. From suspensions engineered to handle maximum loads, to reinforced wheel groups built for extreme stress and longer service life, every component is designed to improve durability and performance where it matters most.

Our braking systems deliver the stopping power and control required in demanding mine conditions, while strengthened final drive designs push rebuild cycles further and improve long-term reliability. Cylinders are rebuilt and upgraded to perform with precision under constant pressure, ensuring consistent operation shift after shift.

OEMS BUILD TRUCKS. WE MAKE THEM STRONGER.

L&H upgrades haul trucks into tougher, smarter machines, engineered to perform in the pit, reduce downtime, and keep production moving.

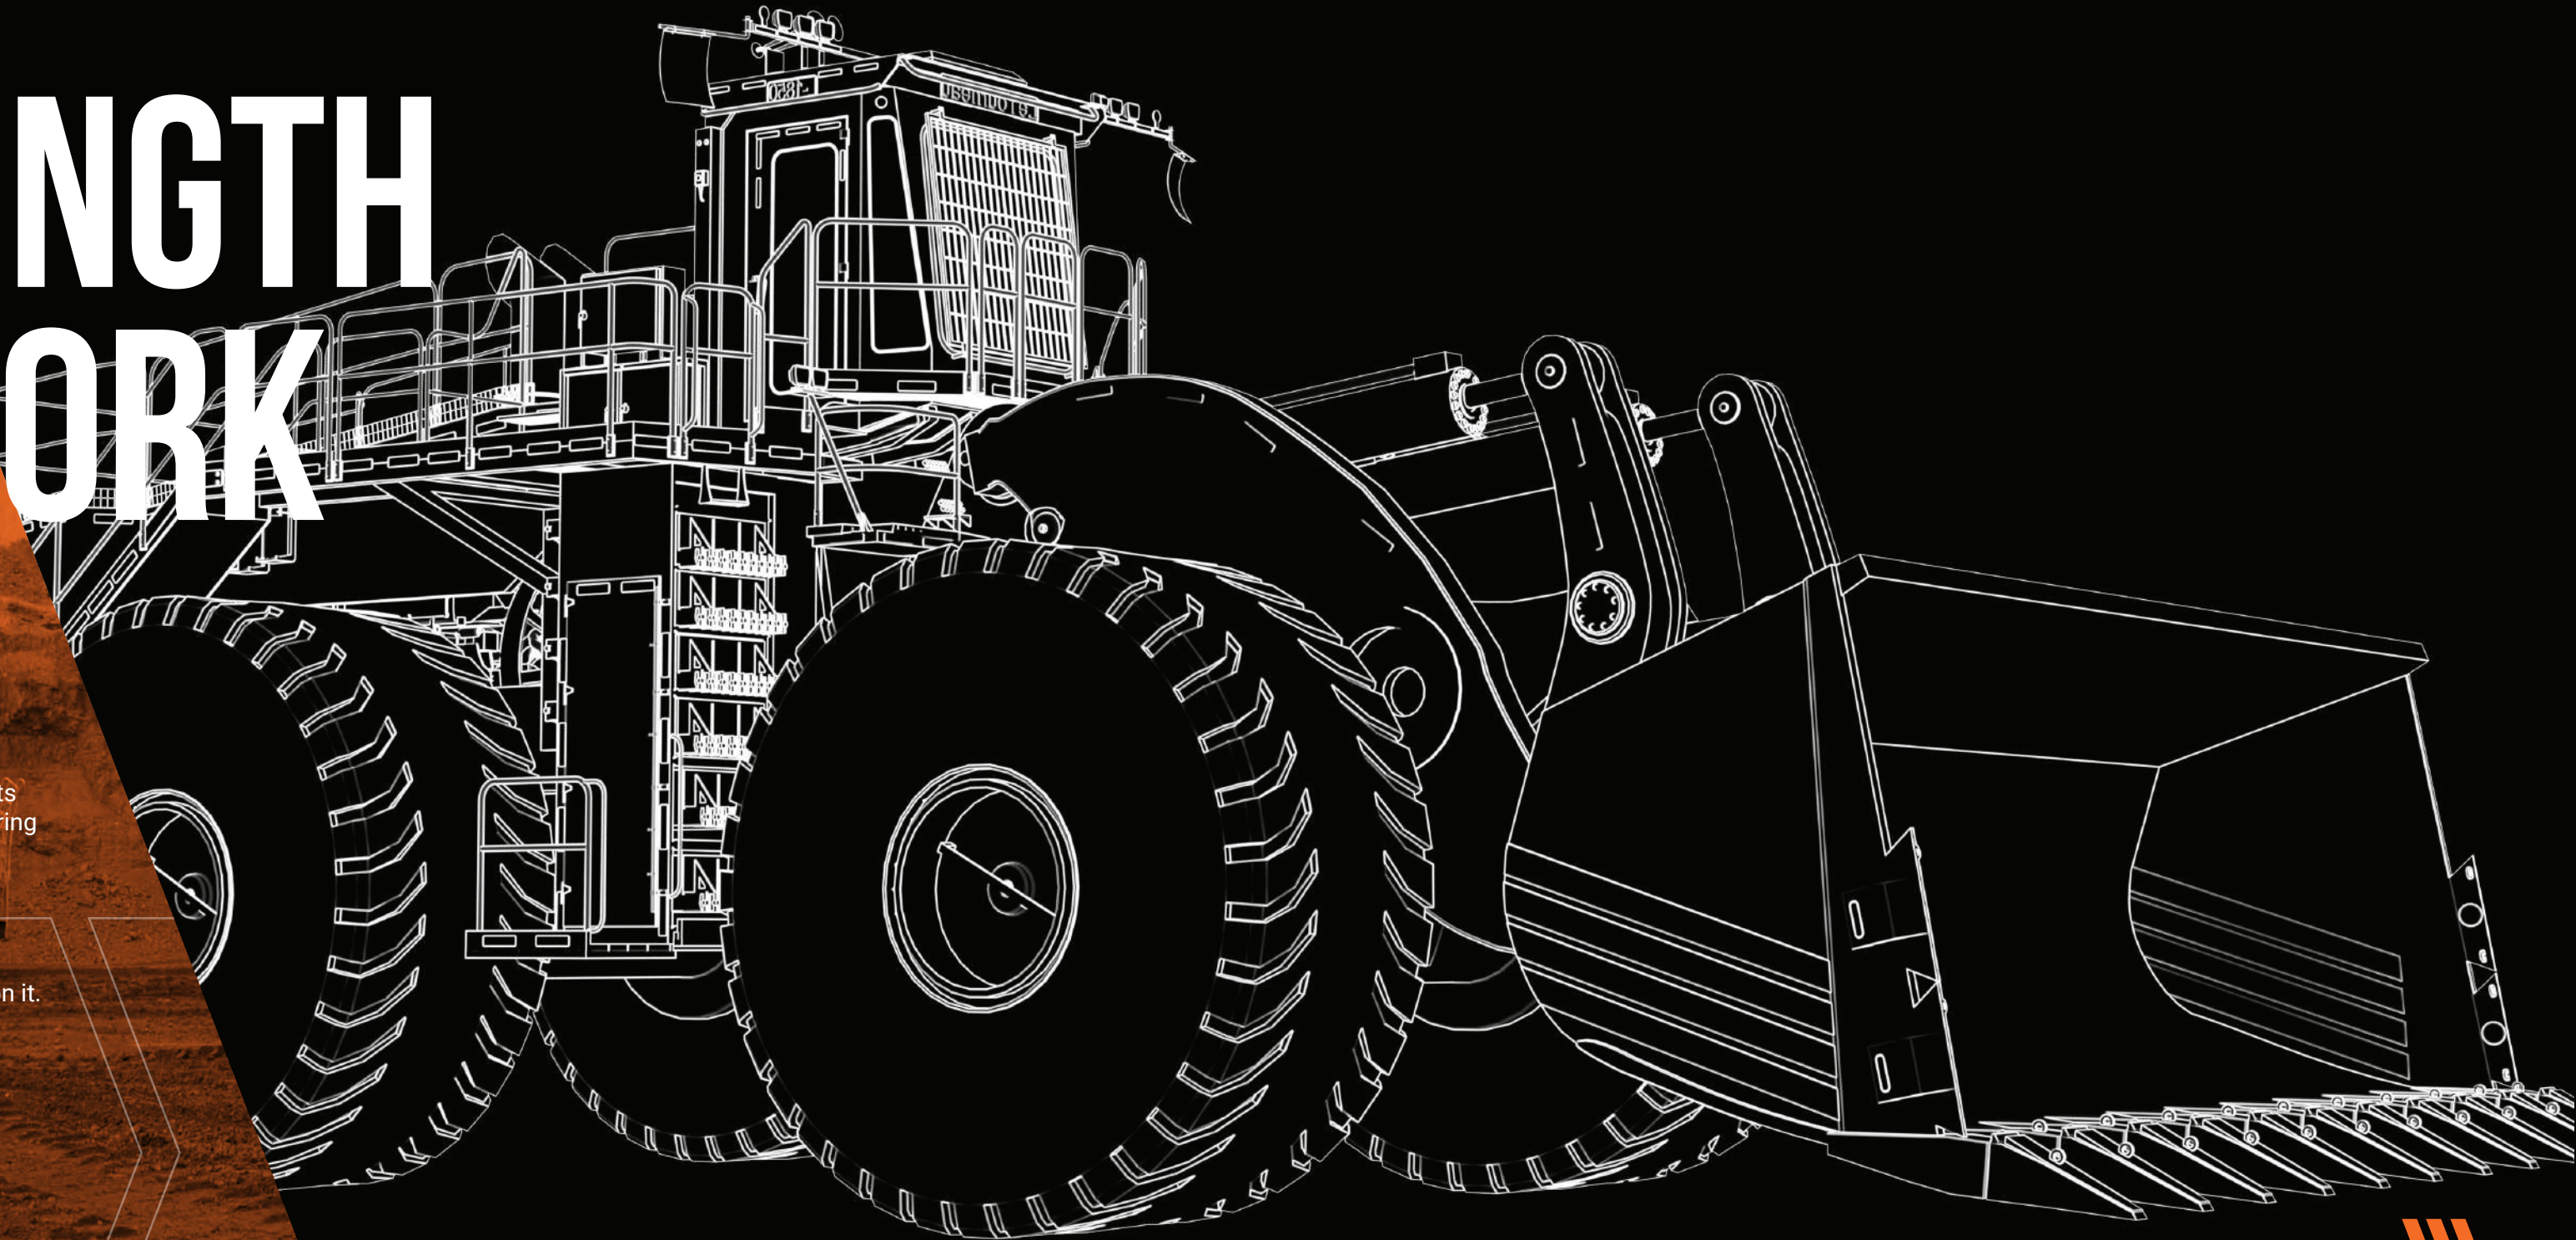

PROVEN STRENGTH FOR HEAVY WORK

Loaders are at the center of production, moving material nonstop in demanding mining conditions. At L&H Industrial, we engineer, rebuild, and upgrade loader systems to deliver more strength, longer service life, and dependable performance across every shift.

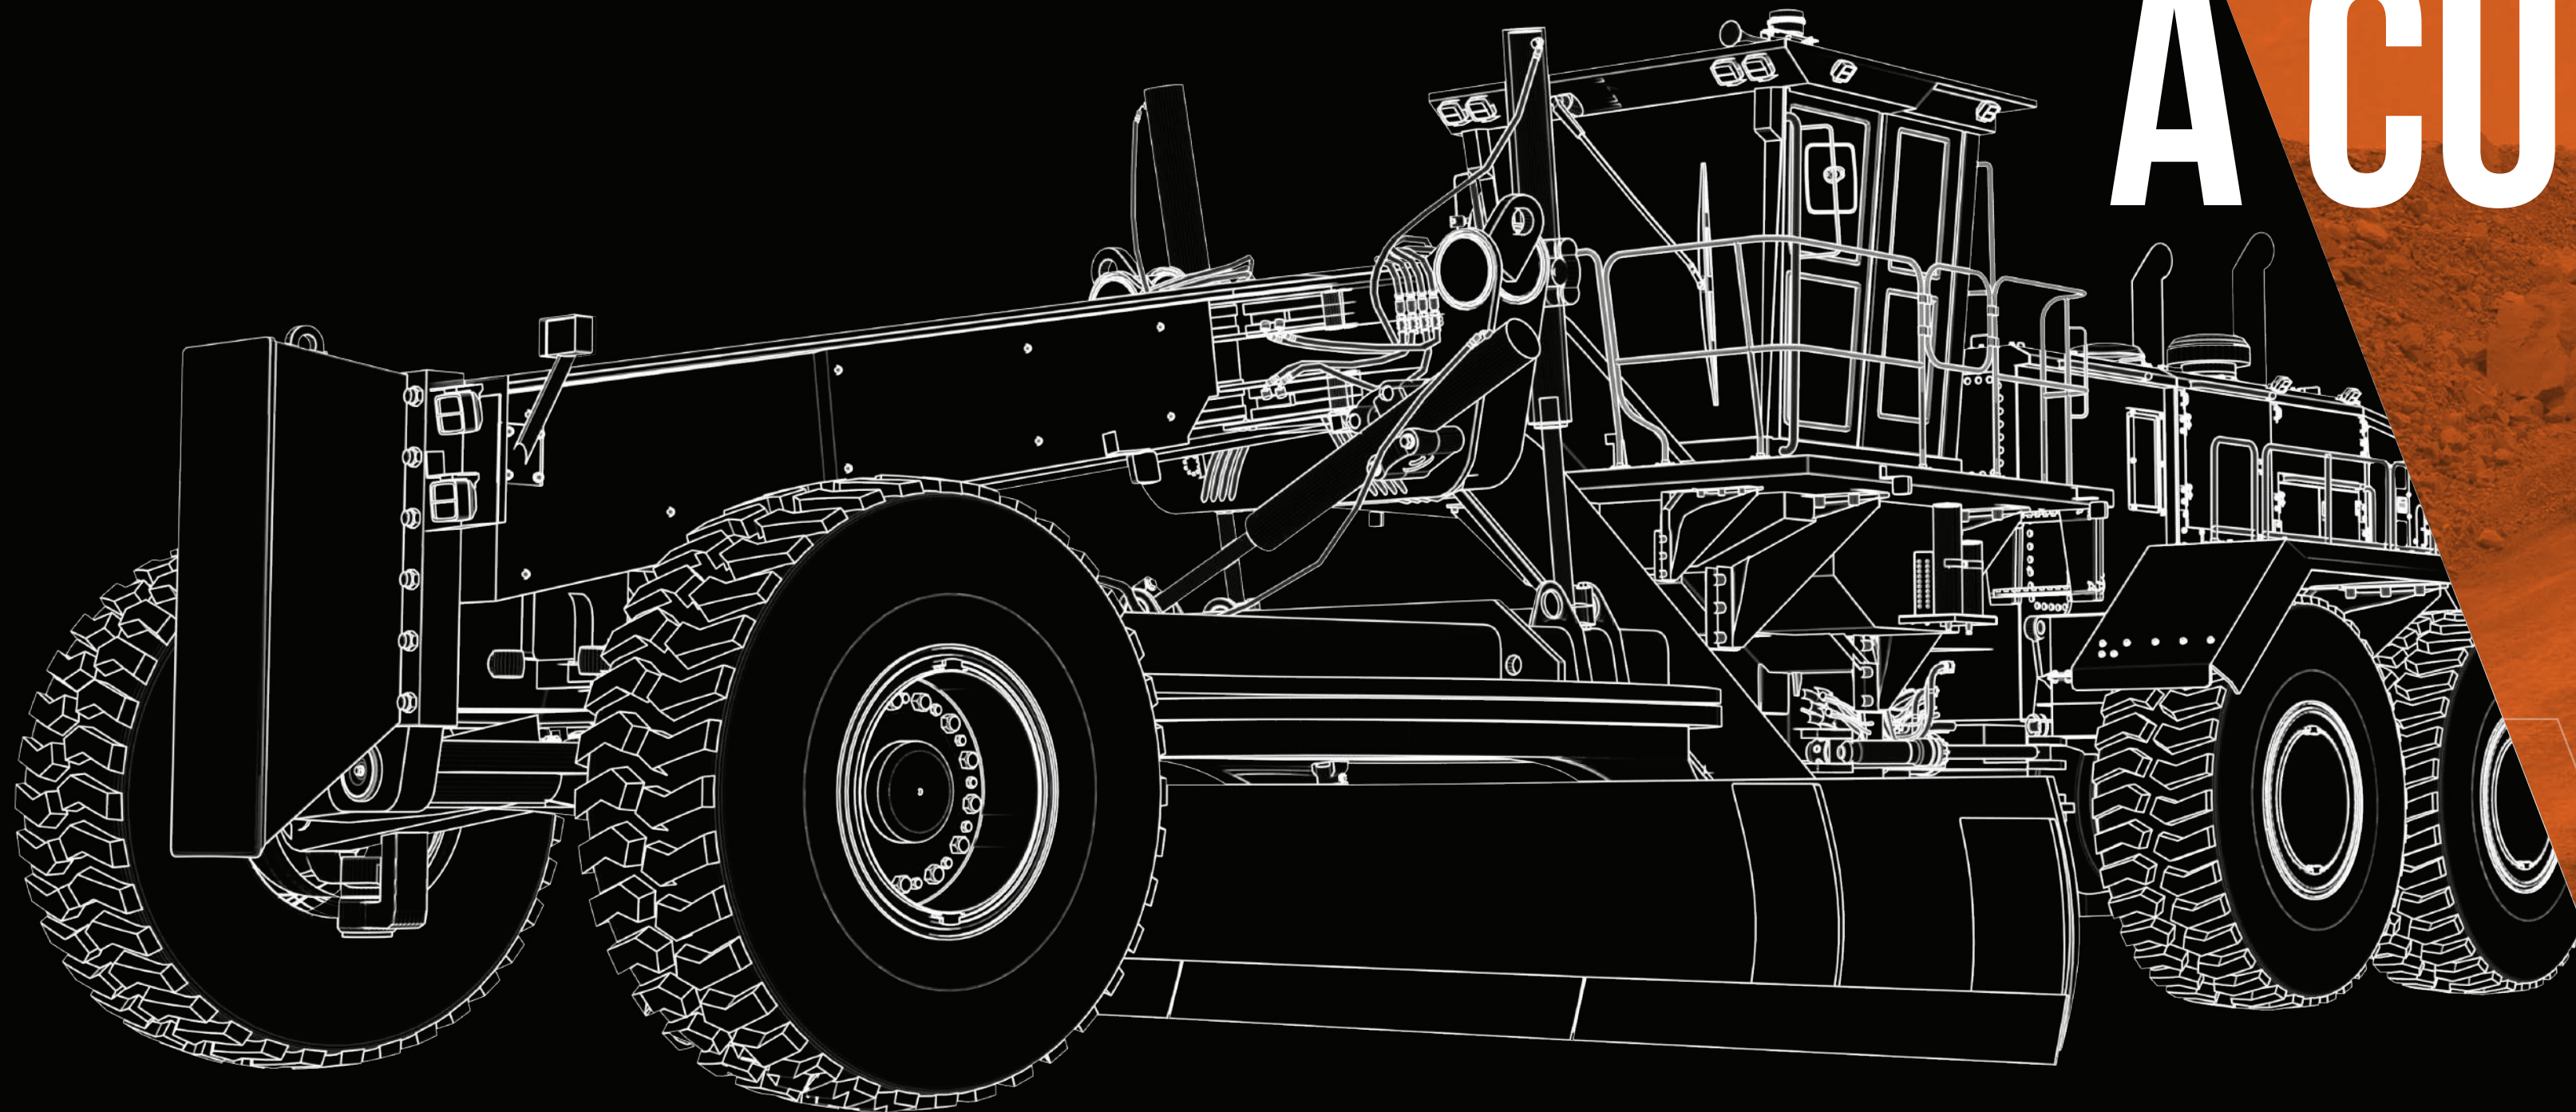

Cylinders are precision-built and chrome-plated to resist surface wear, while frames and structural components are reinforced to withstand extreme operating stresses. Upgraded drivetrain components ensure smooth, reliable power transfer, and linkages and pins are rebuilt to tighter tolerances—delivering durability and consistent performance in constant motion.

FROM FIRST DIG TO FINAL LOAD, WE KEEP PRODUCTION MOVING.

Our loader solutions are built to work harder, last longer, and perform when your operation depends on it.

A CUT ABOVE

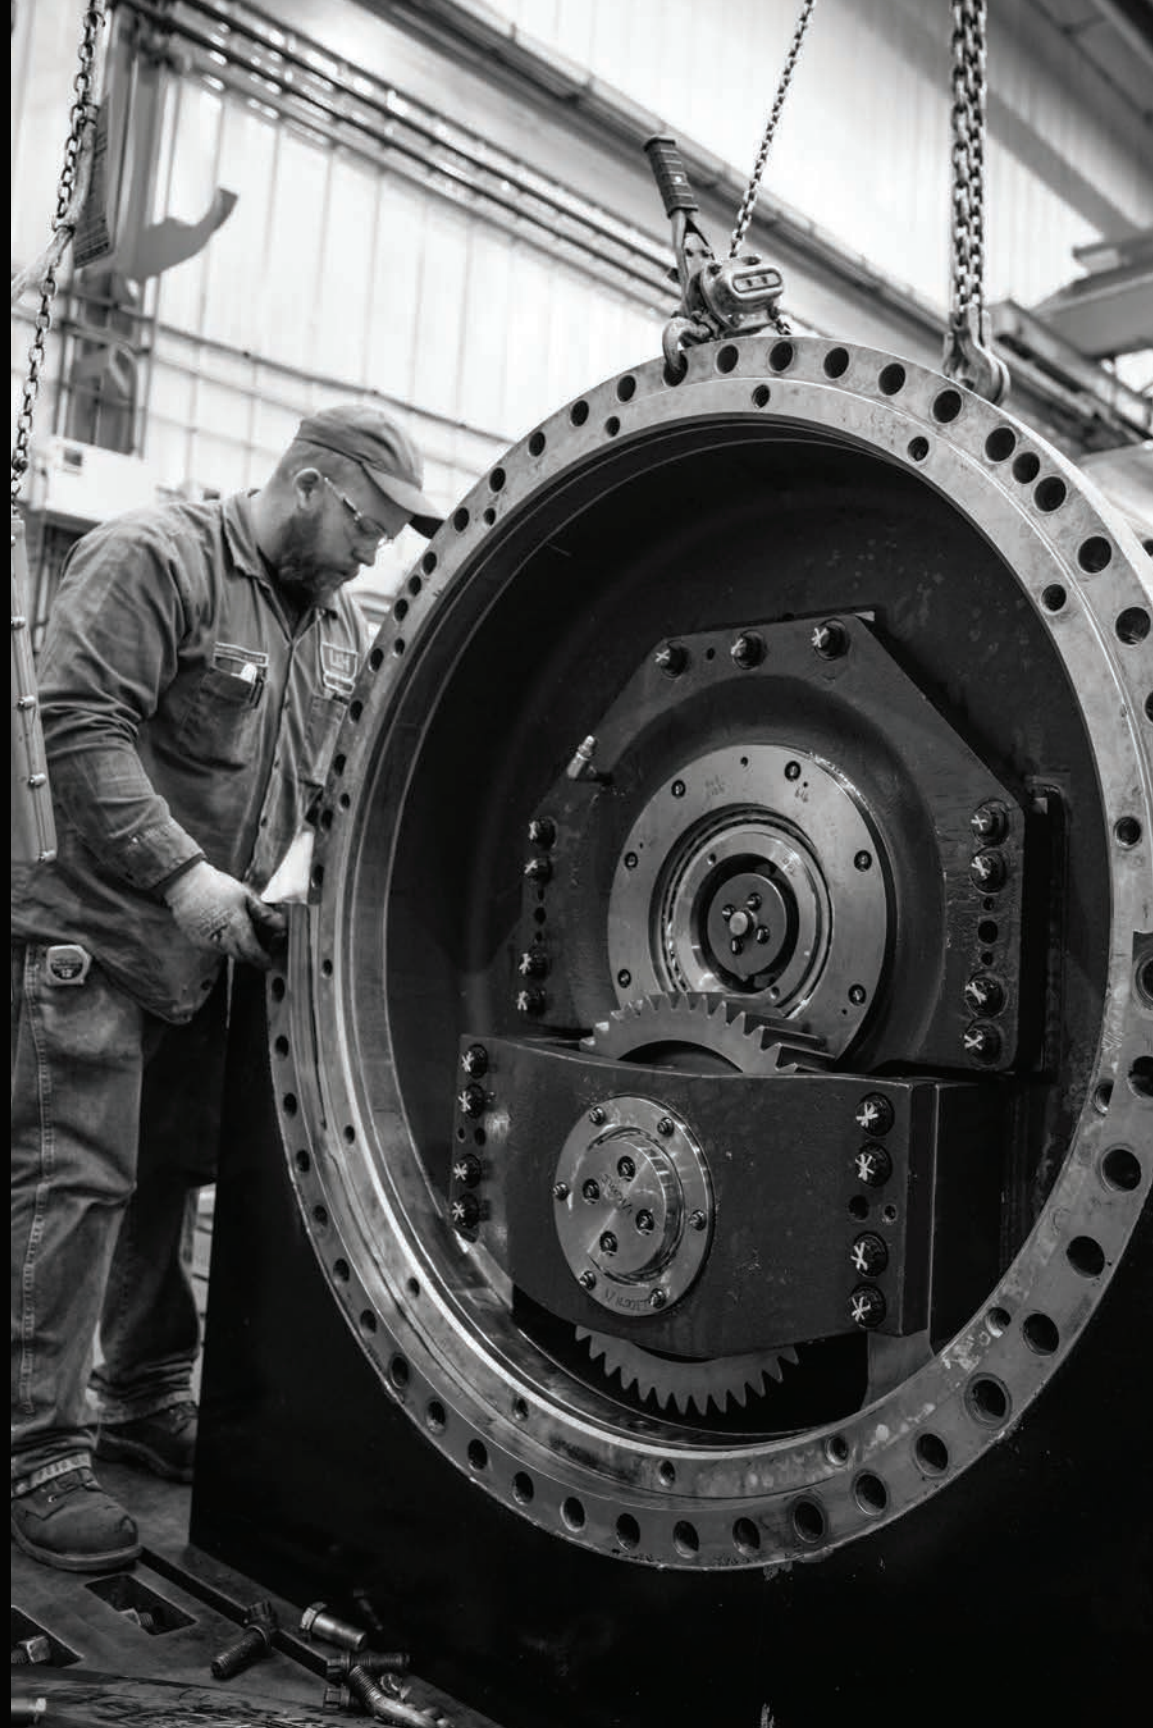

Graders are essential to keeping mines moving, shaping the haul roads that trucks rely on shift after shift. At L&H Industrial, we engineer and manufacture grader components designed to perform under constant load, abrasive conditions, and continuous use—so every cut, every pass, and every mile holds up to the work.

Front axles are rebuilt and upgraded to handle relentless stress, while strengthened drawbars deliver endurance in the harshest environments. Precision-machined circles provide smooth, accurate control, and upgraded moldboards offer stronger rails for reduced cost of ownership. Tandem drives are engineered for reliable power transfer, and reengineered cylinders deliver strength and performance under constant pressure.

MORE THAN SMOOTH ROADS, SMOOTH PRODUCTION.

L&H grader solutions are built to last, delivering reliability, control, and performance across every mile of your operation.

**FROM THE
SHOP FLOOR
TO THE
MINE SITE,
WE'RE IN IT
TOGETHER.**

**THE TOUGHEST CHALLENGES
IN THE PIT AREN'T SOLVED
BY PARTS ALONE.
THEY'RE SOLVED BY PEOPLE.**

We Listen

Our team works directly with yours to understand the challenges that hold you back. Every solution begins with listening first.

We Think Differently

When OEMs stop at standard, we ask, "How can this be better?" That mindset has led to upgrades and innovations that redefine performance.

We Stand With You

From the shop floor to the mine site, our crews show up ready to work as an extension of your team, because your uptime is our responsibility too.

For 60 years, we have built our reputation not just on what we make, but how we partner. Machines may be our business, but people are at the heart of everything we do.
